PRESIDENTIAL PRIVILEGE

Stan Ard
LSPS President

Dear Membership,

First off, I would like to thank all L.S.P.S. members that have reached out to me and my fellow board members regarding the “oral” exam topic. We will continue to oppose this change to the law and I encourage anyone that would like to voice their opinion to the LAPELS board to show up to the November 18 meeting and voice your opposition!

Please also find the results of the poll that was sent out to membership below.

The 2020 convention planning is well underway. Next year’s convention will have a “Business” theme. This is at the request of our membership and we are looking forward to it. The board is also looking into potential new sites for the 2021 convention, and hopefully we will announce that location at next year’s convention.

Lastly, I would like to wish everyone a Merry Christmas and a Happy New Year! This year has flown by and I have enjoyed every minute of representing L.S.P.S. and our great Profession!

Thanks,
Stan Ard

Poll Results (170 Voting Members Responding)

1. The Laws and Rules Committee of the Louisiana Land Surveying and Engineering Board (LAPELS) is recommending to revise the language “oral and written examinations” to “examinations” in Louisiana Revised Statue Title 37 §693.B.3.a and §693.B.4.a that states the requirements for licensure as a Professional Land Surveyor. Do you agree or disagree with this law change?

Results:

135 – Disagree with removing “oral and written from the law.
35 – Agree with removing “oral and written” from the law.

2. Should the oral examination remain as a licensing requirement for Professional Land Surveyors?

Results:

140 – Yes, there should be an oral exam to get licensed.
30 – No, there should not be an oral exam to get licensed.

3. Should individuals residing and licensed out of state (comity applicants) be required to take an oral examination to be licensed in Louisiana?

Results:

119 – Yes, comity applicants should take an oral exam.
51 – No, comity applicants should not take an oral exam.

4. Should comity applicants be allowed to take an oral examination via an online video conference?

Results:

70 – No, comity applicants should meet, in person, with oral exam committee.
100 – Yes, comity applicants should be allowed to take the oral exam via online video conference.

2 sketches drawn in the 1950's by a British Columbia, Canada surveyor named **Doug Meredith**. They were supplied by his son, Scott, who works at Pathfinder Surveys. Doug is deceased and Scott gave permission to publish them. Mr. Meredith was an excellent surveyor who worked all over the globe. He was a pretty good artist as well!

NSRS Modernization News

For all issues of **NSRS Modernization News**, visit:
geodesy.noaa.gov/datums/newdatums/TrackOurProgress.shtml

The NOAA Foundation CORS Network

The count of operational stations in the NOAA Foundation CORS Network (NFCN) increased from 3 to 5 recently, with the addition of ASPA (Tutuila, American Samoa) and CNMR (Saipan, Commonwealth of the Northern Mariana Islands). When completed, the NFCN will consist of 36 stations. For more information, visit the [NFCN](#) page.

ITRF2014 Coordinate Functions

NGS released ITRF2014 coordinate functions for the NOAA CORS Network (NCN) on August 23, 2019. This is a major step toward NSRS modernization, as all four terrestrial reference frames in the modernized NSRS will be defined relative to ITRF2014 (See [Blueprint for 2022, Part 1](#)).

Deprecation of the U.S. Survey Foot

After 2022, the U.S. survey foot will no longer be supported for any component of the NSRS, including State Plane coordinates. Only a single definition of 1 foot = 0.3048 meter (exactly) will be used. This definition is identical to that of the international foot, but will simply be called the foot. This change was announced in a [Federal Register Notice](#) co-issued by the National Institute of Standards and Technology (NIST) and NGS. For more resources visit the [NIST Physical Measurement Lab](#) site.

Progress in Ongoing Projects

There are currently 24 ongoing NGS projects directly related to NSRS modernization. Here are highlights from a select few:

xGEOID19 (Project Manager: Dr. Yan Wang)

NGS has released xGEOID19. In a first for NGS, this experimental geoid model contains time-dependencies, incorporating NGS's fledgling Geoid Monitoring Service (or GeMS; see Section 7 of [Blueprint for 2022, Part 2](#)).

IFVM2022 (Project Manager: Dr. Daniel Roman)

The Scripps Institute of Oceanography has begun a scoping study on the elements needed to accurately and cost-effectively develop a sustainable IFVM2022. The study should conclude in summer 2020. Discussions have also begun with NASA and USGS on the development of a National Land Level Change program.

VERTCON 3.0 (Project Manager: Dr. Dru Smith)

NGS has released new transformations called "VERTCON 3.0 release 20190601" which are incorporated into the [NGS Coordinate Conversion and Transformation Tool \(NCAT\) version 2.0](#) and available for beta testing. These transformations replace all earlier versions of VERTCON, and expand the NGS supported transformations to include Alaska, and all island territories of the USA. Visit the [VERTCON 3.0](#) page to learn more.
